

# DISCOVER SHARD M1.

---

Puncture-resistant,  
search gloves designed  
for control, protection,  
and mission readiness.

# DISCOVERY SHARD M1

Protection where it matters.  
Feel where it doesn't.

The Discovery Shard M1 is a purpose-built puncture-resistant search glove designed for officers conducting prisoner, vehicle, bag and property searches.

Instead of adding unnecessary bulk across the entire glove, the Shard M1 uses zoned protection — reinforcing the areas most exposed to needles and sharp objects while maintaining flexibility and tactile sensitivity where it matters.

## ZONED PROTECTION

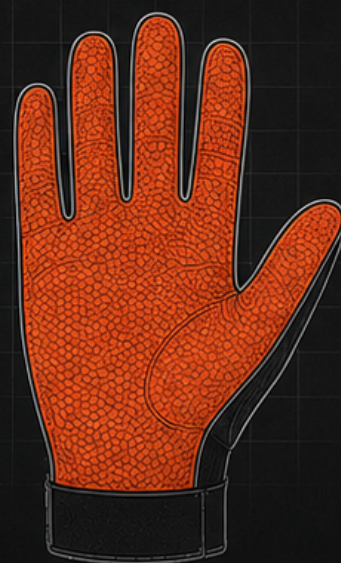

### High-Protection Zones

Needle and cut resistance is concentrated across high-risk contact areas, including the fingertips, thumb, palm and outer hand.

### Low-Bulk Zones

Reduced bulk in lower-risk areas improves dexterity, breathability and natural hand movement.

## BUILT FOR SEARCHING

### Needlestick-First Protection

Targeted puncture and cut resistance for high-risk search areas.

### Tactile Fingertips

Low-profile construction helps preserve feel when identifying small objects and details.

### Touchscreen Ready

Conductive thumb and index finger allow access to compatible devices without removing the glove.

### Breathable Construction

A breathable back-of-hand design supports comfort during extended wear.

# MADE TO WORK LIKE A DUTY GLOVE

Protection is only useful if officers can still work effectively. The Shard M1 combines targeted reinforcement with an articulated, low-profile construction designed for everyday operational use.

## CONTROL IN WET OR DRY CONDITIONS

The palm and gripping surfaces are designed to provide dependable control across both wet and dry environments.

## PRE-CURVED, ARTICULATED FIT

Pre-curved finger construction follows the natural shape of the hand, reducing excess material and supporting comfortable movement.

## LOW-PROFILE DUTY CUFF

A streamlined cuff minimizes interference at the wrist and integrates cleanly with other duty equipment.

## FIT OPTIONS

### REGULAR

Standard hand proportions.

### SLIM / LONG

Designed for longer fingers and narrower hand profiles.

Offering multiple fit profiles helps reduce excess material and improves overall dexterity, comfort and control.

## TECHNICAL OVERVIEW

**PROTECTION:** Zoned needle and cut resistance

**GRIP:** Wet / dry grip

**FIT:** Pre-curved articulated finger construction

**CUFF:** Low-profile duty cuff

**CONSTRUCTION:** Breathable back-of-hand design

**FIT OPTIONS:** Regular and Slim / Long

**APPEARANCE:** Officer-ready tactical design

**BUILT FOR DUTY. ENGINEERED FOR PERFORMANCE.**
