DISCOVERY PATROL - MARK 1

Patrol-optimized insulated outerwear built for duty-belt clearance, direct equipment access, and plate-carrier wear resistance.

BUILT FOR DUTY. READY FOR ANYTHING. —

DISCOVERY PATROL – MARK 1

Patrol-optimized insulation,
mobility and direct equipment access.

The Discovery Patrol Mark 1 is an insulated duty jacket developed around the realities of frontline patrol — duty-belt clearance, equipment access and repeated wear with a plate carrier.

A purpose-built patrol cut keeps the jacket clear of critical equipment while maintaining coverage and a professional uniform profile.

THE PATROL CUT

Traditional jackets often extend directly over the duty belt, causing bunching and interference with equipment.

The Mark 1 uses a shortened front hem and raised sides to sit above the belt, while a longer rear hem maintains coverage when standing, moving or working outdoors.

TRADITIONAL CUT

Bunches over the duty belt

MARK 1 PATROL CUT

Clear belt access with full coverage

LONGER REAR HEM

Maintains coverage when moving or bending

BUILT FOR PATROL

DUTY-BELT CLEARANCE

Shortened front and raised side hems reduce bunching at the equipment line.

DIRECT EQUIPMENT ACCESS

Two-way side zippers provide fast, unobstructed access to duty equipment.

REAR COVERAGE RETAINED

A longer rear hem maintains protection without compromising belt access.

PLATE-CARRIER READY

Reinforced high-wear zones are positioned where body armour repeatedly contacts the jacket.

INSULATED PROTECTION

Weather-resistant shell with insulating layer built for cold conditions.

TWO-WAY SIDE ZIPPERS

Low-profile zippers open from either direction for direct access to duty equipment.

ENGINEERED FOR DAILY WEAR

The Mark 1 combines a lightweight stretch shell with targeted reinforcement in the areas exposed to the greatest operational wear.

MECHANICAL STRETCH SHELL

A TORAY Mechanical Stretch Mini-Rip lightweight nylon shell supports mobility while maintaining a clean, low-profile patrol appearance.

The material platform is selected to provide lightweight performance without unnecessary bulk.

TARGETED ABRASION RESISTANCE

160D–210D high-tenacity nylon reinforcement is positioned in plate-carrier contact zones, including high-wear areas across the upper chest.

This targeted approach adds durability where it is needed without reinforcing the entire garment.

LOW-PROFILE SIDE ZIPPERS

Two-way side access zippers sit flush when closed, preserving the jacket's streamlined profile while remaining immediately available when equipment access is required.

TECHNICAL OVERVIEW

	Shell:	TORAY Mechanical Stretch Mini-Rip lightweight nylon
	Reinforcement:	160D–210D high-tenacity nylon
	Reinforcement Zones:	Plate-carrier contact and upper-chest wear areas
	Cut:	Shortened front with raised sides
	Rear Hem:	Extended for retained coverage
	Access:	Two-way side access zippers
	Intended Use:	Patrol / duty operations
	Design Priority:	Mobility, belt clearance and equipment access

PURPOSE-BUILT FOR PATROL. DESIGNED AROUND THE OFFICER.
