

DISCOVERY WINTER M1

**BUILT FOR COLD-WEATHER OPERATIONS.
ENGINEERED FOR PERFORMANCE.**

A next-generation winter patrol jacket purpose-built for officers operating in severe conditions, combining warmth, durability, weather protection, and immediate access to mission-critical gear.

DISCOVERY WINTER M1

**Built for cold-weather operations.
Engineered for performance.**

The Discovery Winter M1 is a purpose-built patrol jacket for officers working in demanding winter conditions.

Designed around the realities of duty-belt use, it combines weather protection, insulation and reinforced construction with unrestricted access to essential equipment.

DUTY-BELT ACCESS WITHOUT THE BULK

Traditional winter jackets can bunch around the waist, interfere with equipment and restrict access to a firearm, radio or pouches.

The Winter M1 uses a custom Gunslinger Cut with a raised front and shaped side hem to clear the duty belt while maintaining longer rear coverage for warmth and protection.

TWO-WAY SIDE ACCESS

Full-length, two-way side zippers can be opened from the top or bottom, providing direct access to duty equipment without lifting or removing the jacket.

BUILT FOR PATROL

COLD-WEATHER PROTECTION

Insulated construction provides dependable warmth while remaining comfortable for active duty use.

RAIN + SNOW PROTECTION

A weather-resistant outer shell and sealed construction help protect against wind, rain, snow and moisture.

AXON COMPATIBLE

A reinforced, low-profile mounting platform supports Axon Body 3 and 4 cameras.

REINFORCED DURABILITY

Abrasion-resistant overlays reinforce high-wear areas including the elbows and hem.

PURPOSE-BUILT. OFFICER-FOCUSED. MISSION-READY.

PURPOSE-BUILT FROM THE INSIDE OUT

Every element of the Winter M1 is designed to support operational use — from equipment access and communications routing to insulation, storage and mobility.

CLIMASHIELD® PRISM INSULATION

3.0 oz premium synthetic insulation delivers warmth with low bulk and compressibility for active cold-weather operations.

INTERNAL COMMS ROUTING

Integrated internal channels allow communication cables to route cleanly from the lower interior to the shoulder mic position.

SECURE STORAGE

Dedicated interior document and zippered security pockets keep maps, paperwork, valuables and essential equipment organized and accessible.

REMOVABLE HOOD

A secure two-way zipper attachment allows the hood to be removed when conditions or operational requirements change.

PERFORMANCE OVERVIEW

Temperature Range:	-20°C to +5°C
Weather Protection:	Waterproof / windproof construction
Intended Use:	Patrol, duty and tactical operations
Fit:	Athletic / patrol fit
Designed To Wear Over:	Plate carrier and duty gear
Lining:	40D nylon ripstop
Insulation:	Climashield® Prism 3.0 oz
Zippers:	YKK®
Cuffs:	Elastic cuffs for a secure seal
Hem:	Adjustable with internal drawcord

BUILT FOR LONG-TERM DUTY USE

High-stress seams and high-wear areas are reinforced for durability, while stretch panels and an articulated patrol fit support mobility without unnecessary bulk.

Purpose-built. Officer-focused. Mission-ready.
